Problem statement

Internet is just a mean of communication

Internet would become the communication platform that grables effective dialogues

Government

Opposition

General public

Communication matrices in the political stage

Background

Web 1.0 Web 4.0

- Padró-Solanet, Albert. 2008. Partidos y política en Internet. un análisis de los websites de los partidos políticos catalanes. IDP. Revista de Internet, Derecho y Política 6: 46-65.
- Lilleker, D. G, & Jackson, N.A. (2010). Towards a More Participatory Style of Election Campaigning. The Impact of Web 2.0 on the UK 2010 General Election. Policy & Internet, 2(3), 69-98.
- Simón P. F., Orge C., & Ainara L.U. (2018). Online communication spaces and their impact on Basque politics: strategies for a dialogue 2.0. Los espacios de comunicación online y su impacto en la política vasca: estrategias para el diálogo 2.0., 457 470.

Analysis of network interactions

- Tufekci, Zeynep and Christopher Wilson. 2012 "Social Media and the Decision to Participate in Political Protest: Observations from Tahrir Square." *Journal of* Communication 62:363–79. http://dx.doi.org/10.1111/j.1460-2466.2012.01629.x

Political dialogue in the social media

McCullagh 2002; Choi, Lee. 2015; Chan 2016; Lu & Lee 2020

Castells 2001; Putnam 2000; Sustein, 2007

The goal of the study

 Analysis of the specificity of digital dialogue between the government and opposition representatives with users of the network

The theoretical framework

Multimodality

Kress, Gunther. 2002.

"The multimodal landscape of communication." Medien Journal 4: 4 – 19.

Kress, Gunther. 2003. *Literacy in the New Media Age*. London: Routledge.

Kress, Gunther. 2010. Multimodality. A Social Semiotic Approach to Contemporary Communication. London: Routledge.

Mondada, Lorenza. 2014. "Bodies in action: Multimodal analysis of walking and talking." Language and Dialogue 4 (3): 357 – 403.

The theoretical framework

Pycholinguistic analysis of Big Data

Lerique, Sébastien, and Camille Roth. 2018. The Semantic Drift of Quotations in Blogspace: A Case Study in Short-Term Cultural Evolution. *Cognitive Science* 42: 188–219.

Social network analysis

Murata, T. (2010). Detecting communities from tripartite networks. In: Proceedings of the 19th International Conference on World Wide Web, WWW 2010, Raleigh, North Carolina, USA, April 26-30, 1159-1160.

Opsahl, T. (2013). Triadic closure in two-mode networks: Redefining the global and local clustering coefficients. Social Networks, 35 (2).

Roth, C. & Cointet, J.-P.. (2010). Social and semantic coevolution in knowledge networks. Social Networks, 32, 16-29. doi.10.1016/j.socnet.2009.04.005.

Method

- neural network approach (Kharlamov & Pilgun, 2020);
- psycholinguistic analysis of social media content (Lerique & Roth, 2018);
- analysis of communicative behavior (Courtright, 2014).

Procedures

- 1. Content selection and purification (filtering).
 - 1.1. Isolation and extraction of bots.
 - 1.2. Identification and analysis of digital footprint (VKontakte, Facebook, Odnoklassniki, Live Journal, Twitter, Instagram, blogs).
 - 1.3. Selection of posts (VKontakte).
 - 1.Selection and analysis of influencers' posts.
 - 1.3.1. Selection of comments (VKontakte, Odnoklassniki, Live Journal, Twitter, blogs).
- 2. Identification of the topic structure of the selected network content.

- 3. Identification of key topics.
- 4. Content ranking (messages, authors, loyalty, involvement, audience).
- 5. Extraction of the semantic core.
- 6. Text analysis of the semantic core.
- 7. Constructing a semantic network.
- 8. Performing an associative search, analysis of word association, constructing an associative network.
- 9. Carrying out content analysis
- 10. Detection of social stress (for the method of detecting social stress, see Kharlamov, and Pilgun 2020).

Result and discussion

The summarization algorithm

main topics:

allegations of corruption:

The master of Russia is Pyotr Pavlovich Biryukov, a typical official of the 'experienced manager' type.

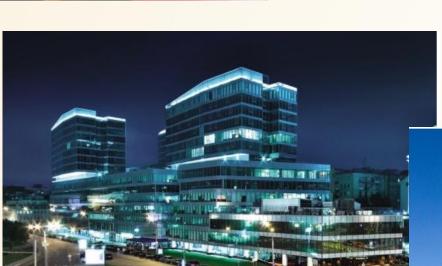

Mayors, presidents and countries changed, but he always worked for the state.

Main topics

High-end real estate assets of the Biryukov's family members:

- Back then, Medusa wrote about giant penthouses in the city center that belong to the Biryukov's family.
- The most elite district of Moscow; the cost per square meter of 1 million 100 thousand rubles; in this house, there is an apartment of journalist Dmitry Kiselyov, just like that.
- This apartment belongs to his daughter Irina and grandson Nikita.
- The same grandson of Peter Biryukov, Nikita, at the age of 19 bought a 307-meter apartment in the super-elite residential complex 'Sytinsky'.

Main topics

Number and cost of cars in the Biryukov's family:

Daughter Irina – TOYOTA LAND CRUISER, RANGE ROVER, BMW 750.

Grandson Nikita — LEXUS LX570 and MERCEDES-BENZ GLE450 for 14.3 million.

Niece Anzhelika – LEXUS LX 570, TOYOTA LAND CRUISER and BMW X6 for 17 million rubles

Main topics

 Calculations and assessments of the Biryukovs' general fortune, which significantly exceeds the legal income of family members, could not be acquired for the salary of the Deputy Mayor:

According to open sources, we found that the family of the official Biryukov have apartments and offices for 4.3 billion rubles, cars for 176 million and a summer cottage for a billion.

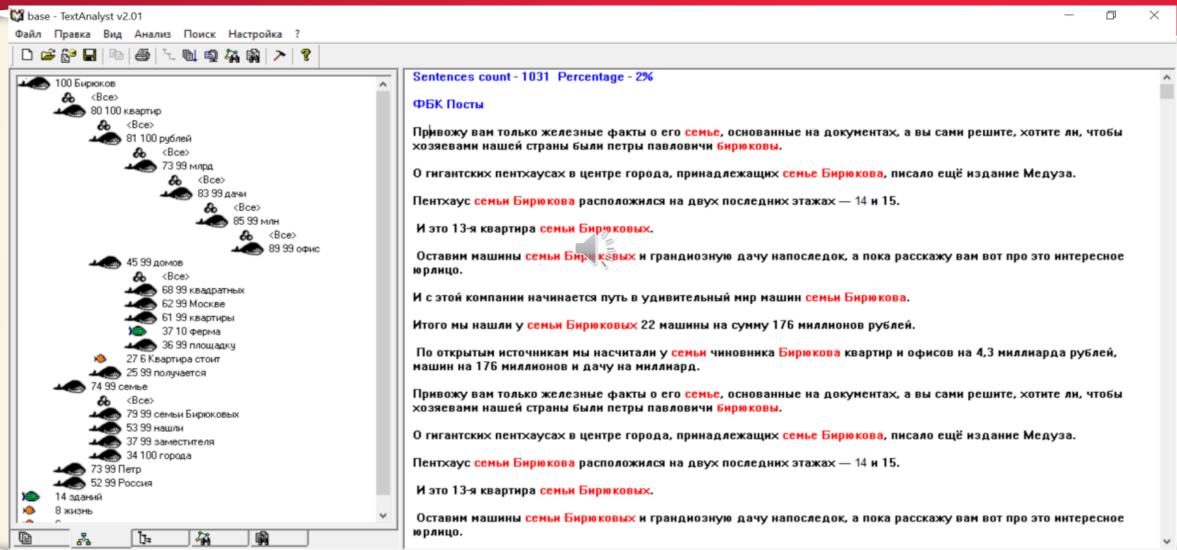

The children's slide at the cottage of Sobyanin's Deputy costs 3.5 million rubles.

The topic structure of the post content

 The family of Sobyanin's Deputy for issues of housing maintenance and utilities and amenities owns assets costing 5.5 billion. VIDEO

 The relatives of the vice mayor own luxury apartments and cars. They also have an extensive land plot in the Moscow suburbs with their own farm.

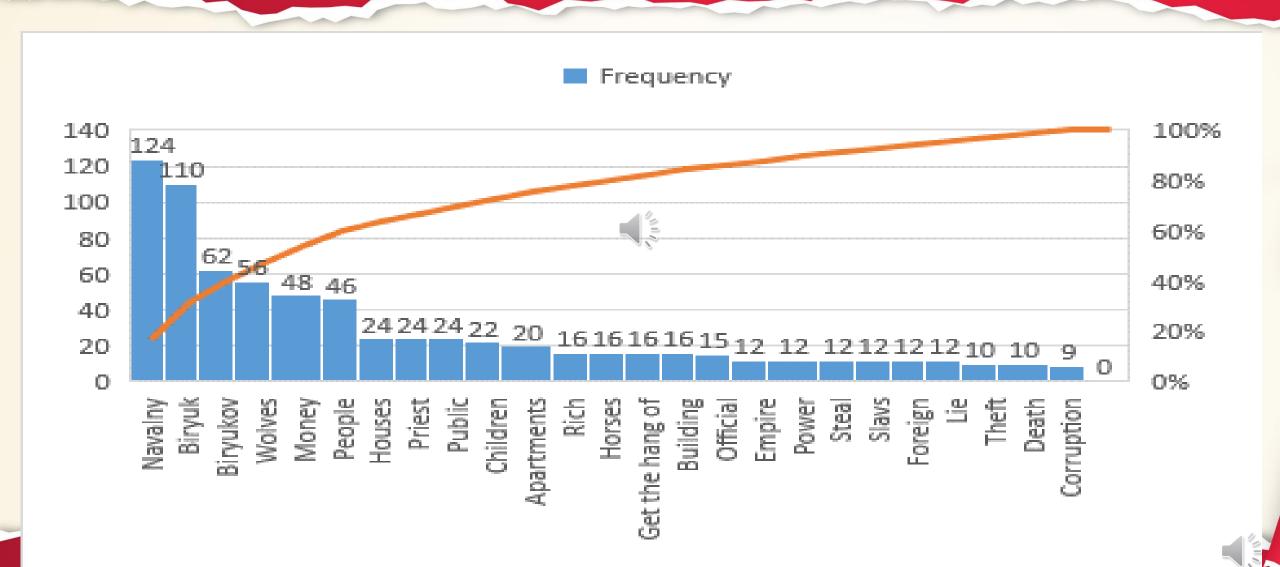

The topic structure of the post content

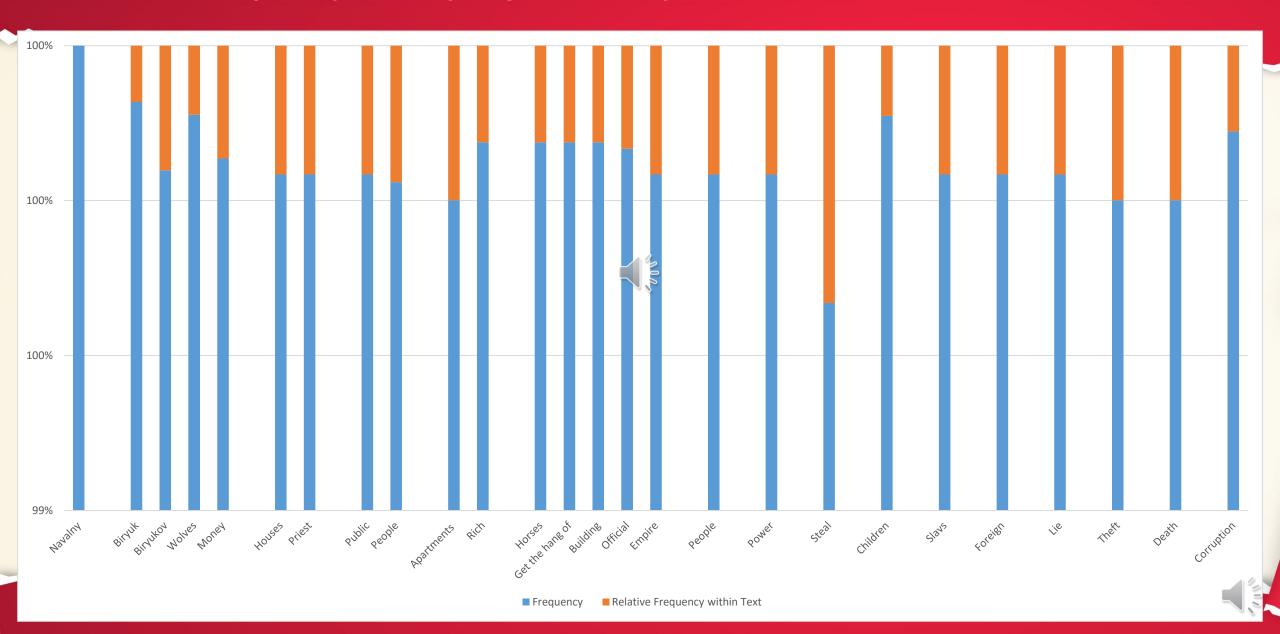

Topic structure of user's comments

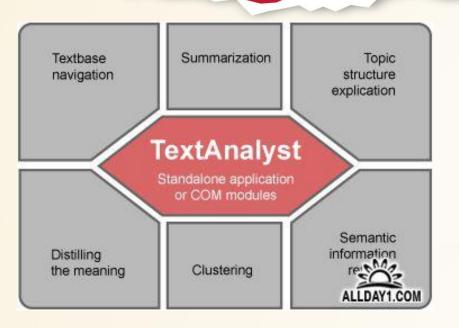

Most frequent concepts in users' comments

Relative frequency of concepts in users' comments

- Word associations
 - P. Biryukov is a symbol of a corrupt official.
- Associative network ('Biryukov' index of (10/193):

All that is said about Biryuk is pure truth, high-level officials of big cities make corruptively crazy money using their power, but in small cities they steal no less.

And how many of such Biryukovs are in Moscow, St. Petersburg and other cities!

I see only the facts of theft committed by our officials.

The users' perception. The semantic associates

'Government' (10/46)

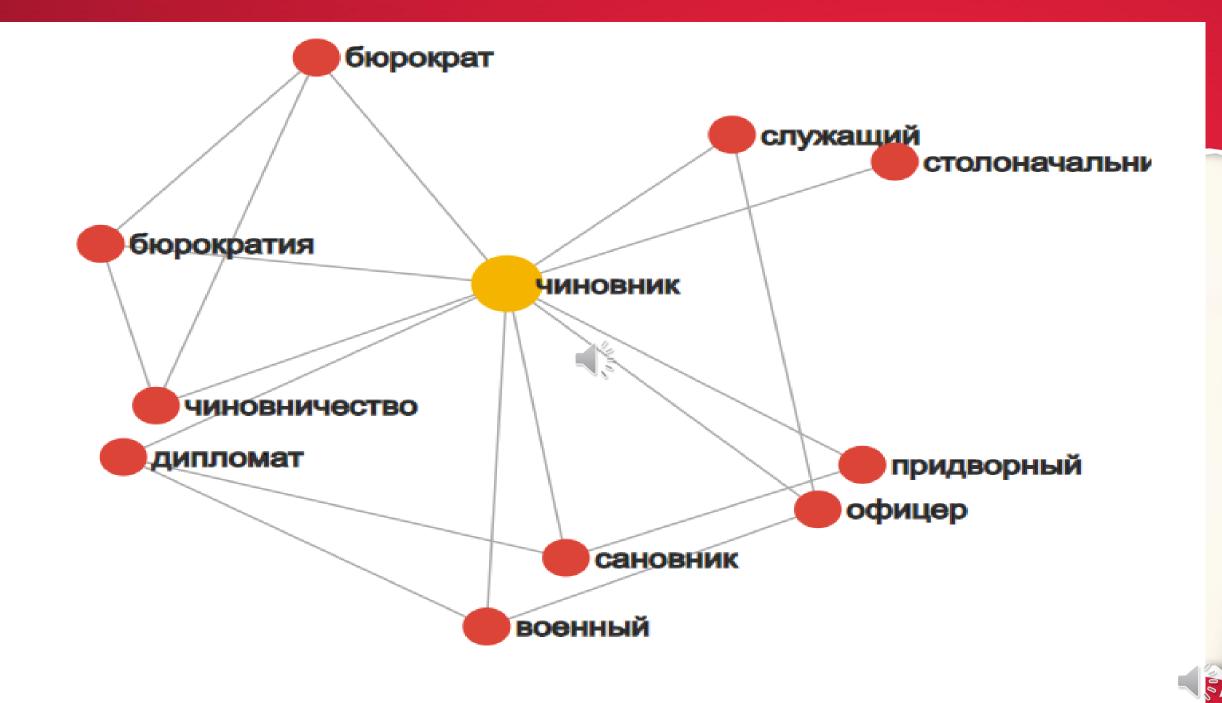

theft of officials (38) corruption (38)

The semantic associates for the word 'official' (National Corpus of the Russian Language and Wikipedia)

Word	Cosine proximity
Public servant	0.660
Bureaucrat	0.610
High official	0.609
Bureaucracy	0.570
Officialdom	0.569
Military	0.553
Officer	0.551
Head of a 'desk'	0.551
Courtier	0.545

The users' perception. Associative search with the incentive word 'official'

- I see only the facts of theft committed by our officials (23),
- snotty official (19),
- the snotty (17),
- invaders (17),
- blood (17),
- court (17),
- money (5),
- corruption (5).

 Russia is a modest government official Igor Ivanovich Shuvalov, who has 13 luxury apartments in Moscow, a summer residence in Moscow, an apartment in London, a castle in Austria, a garage full of luxury cars and a private plane (his little dogs fly on it).

 Do not tear up my values; better pool some money in SMSs for the treatment of children.

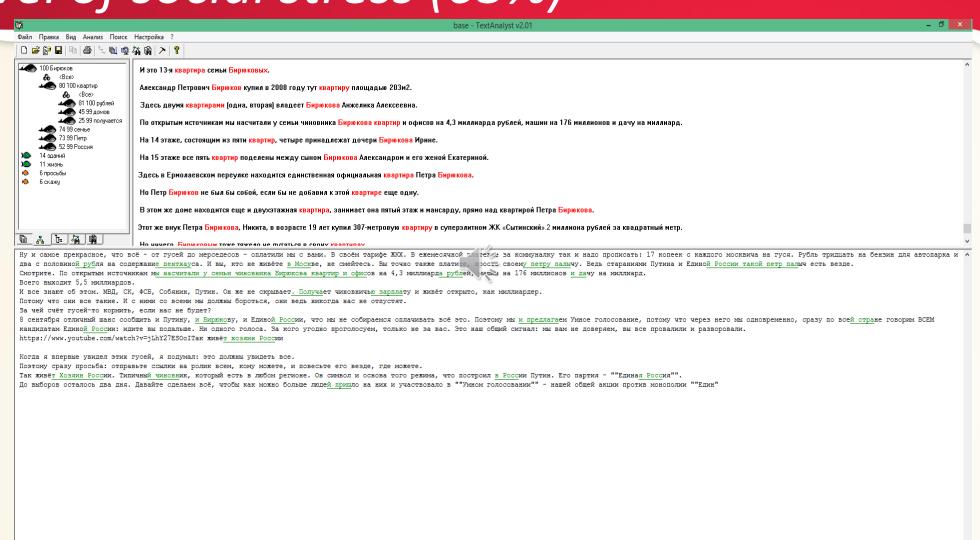

Well done, navalny ... have a straight talk with the people

Alex himself lives darn well, while not working at all

Nobody makes a hero of Navalny, but he shows the source of information about the snotty official, and this is not a one-off case in our time.

In this case, the source of information is Navalny.

Level of social stress (63%)

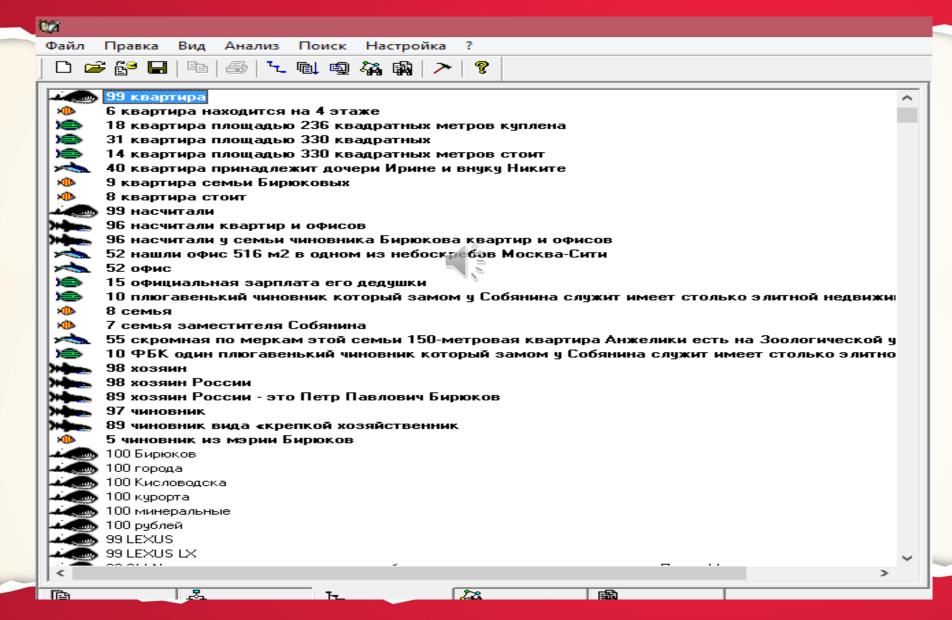

Semantic network expressing social stress

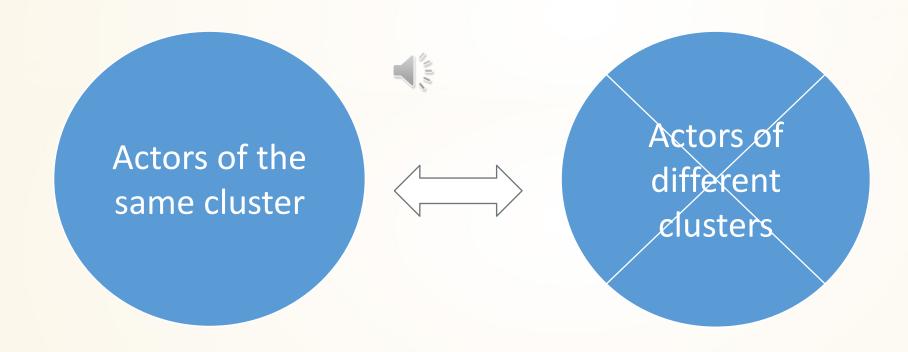

Conclusion

Government Dialogical communication Technocratic matrixes matrixes General Opposition public

Conclusions

Digital dialogue
